

# Standard General Inc.

EDMONTON

*Building Better Roads*

**Standard General Inc.** is a major construction contractor serving the greater Edmonton region since 1969. We complete major roadway and private development projects throughout the greater Edmonton area. Our core business is road construction and paving material production and sales

Standard General completes numerous municipal, commercial and industrial projects each year in the Greater Edmonton area. We bring extensive experience and specialize in many facets of civil construction and reconstruction both as a General Contractor and as a sub-contractor.

Our team consists of highly skilled professionals who pride themselves on providing the highest quality of workmanship on the projects that we undertake, and always commit to conducting ourselves with the highest of regards for safety, environmental protection and the needs of the citizens of the communities in which we work.

At Standard General, we take pride in our work and strive to exceed our customer's expectations. We have a long history of providing our clients with quality work and are well known and respected in the marketplace.

## Values

**Safety:** We will provide a safe, healthy work environment for all employees and those around us at all times.

**Environment:** We will minimize our environmental impact and protect the communities we live and work and adhere to all applicable laws and regulations.

**Ethics:** We will conduct our duties with the highest of personal standards and deal fairly and honestly in every transaction we do, both internally and externally.

**Continuous Improvement:** We will focus on continuous improvement, not only in our work and the products and services we provide, but also in ourselves.

**Integrity:** We will act with honesty in all of our business and day to day dealings with our coworkers and our clients and never misrepresent our company.

## Core Beliefs

### Vision

Standard General will strive for continuous growth by constantly improving efficiencies in everything we do while ensuring our employees and our clients are always valued to ensure the company's future success.

### Mission

Standard General's mission is to procure, plan and manage infrastructure projects and processes by providing the highest quality of products and services to our customers. This mission is ongoing and we will continue this by constantly striving for excellence in everything we do.

**Respect:** We will respect all employees, clients, and partners equally, while recognizing the importance of diversity.

**Employees:** We will provide an environment with high morale, respect and a focus on improved education and learning. Employees are the most important resources we have.

**Teamwork:** We will work together and support each other to complete the work required to do to make us succeed.

**Work/Life Balance:** We will be flexible in supporting our employee's work / life balance and believe this to be vital to the overall well being of our employees.

**Leading by Example:** We will conduct ourselves in manner that displays the characteristics we would expect of others.

Standard General Inc. is proud to provide road construction services and material supply to our clients in the City of Edmonton and surroundings areas utilizing our vast expertise and experience. We deliver our projects on time and on budget and provide the highest quality products and construction services to the Capital Region marketplace. At Standard General, we aim to satisfy each and every one of our clients, to build long term relationships.

**Standard General specializes in the following areas:**

## **Construction Services**

### **Road Construction / Asphalt Paving Services**

Standard General's specialty is road construction and no job is too big for us. Our construction services span numerous clients in the residential, municipal and industrial markets and we have completed some of the largest projects in the Edmonton capital region. From the overlaying of a driveway to the complete construction of a new roadway, Standard General has the expertise to deliver the finest quality paving services to the Greater Edmonton region.

### **Municipal Construction, Rehabilitation and Residential Servicing**

Standard General specializes in all phases of municipal infrastructure work including both new construction and the rehabilitation of existing municipal infrastructure. We service the greater Edmonton area including the City of Edmonton, City of St. Albert, Morinville, Leduc, Spruce Grove, Stony Plain, Fort Saskatchewan and Sherwood Park. Our services include, road construction, base course work, concrete curb and gutter, asphalt paving, driveways, underground utilities, landscaping and street lighting. We can project manage any municipal project to ensure the finest construction available.

### **Commercial Servicing**

We provide many construction services to our commercial clients including parking lot construction, base work, site preparation, concrete works, asphalt paving, storm and sanitary services, maintenance, landscaping and removal and recycling of existing materials. We deliver your commercial projects on time and on budget.

## **Industrial and Energy Sector Servicing**

Standard General can supply many products and services to the industrial and energy sectors. Such things include: material supply of aggregates, asphalt and soil cement, road construction, soil stabilization, concrete work, parking lots, base course work and roller compacted concrete.

## **Freeway, Primary and Secondary Highway Construction and Rehabilitation**

Large volume and high production paving is the focus of our experienced group of paving personnel. This includes placing and compacting asphalt concrete mix on top of the granular base course, pavement rehabilitation and overlay projects. The work is done with various pieces of paving, compaction, loading and hauling equipment.

## **Granular Base Construction**

Our base crews are specialists in preparing base surfaces and can load, haul, shape and place incredible volumes quickly. This includes preparing existing subgrade and placing and compacting a granular layer for final asphalt paving. The aggregate used for base construction comes from our Windfall Gravel Pit, where we manufacture various base materials, to ensure Standard General can meet any given specification.

## **Civil, Commercial and Industrial Concrete Work**

Standard General's concrete divisions specialize in the new construction and maintenance of any concrete work including sidewalks, roll or straight face curbs and gutters, barriers and medians. Our concrete crews are well experienced professionals who take great pride in their work and deliver a high quality product.

## Material Production, Sales and Specialty Processes

### Asphalt Manufacturing and Sales

Standard General manufactures and sells high quality hot and warm mix asphalt to our clients from our Acheson, Yellowhead and Leduc facilities. Our asphalt meets all provincial, municipal and industrial specifications and is produced in our state of the art manufacturing plants. We produce various blends of asphalt and manufacture based on the specifications of each client. Our asphalt is produced not only to meet our own requirements but to sell to our 3rd party clients from each of our plant locations. Each mix we produce is tested in house to ensure that our product is of the highest quality.

### Aggregate Manufacturing and Sales

Standard General produces various aggregate materials from our Windfall Gravel Pit, near Whitecourt and shipped by rail to our aggregate depots in Acheson, Conklin and the Industrial Heartland. Our material is transported by rail to supply not only our facilities and our capital region clients, but also to the industrial market. Our aggregates are of the highest quality and are produced to meet any government or industrial specifications.

### Ecomat Warm Mix Asphalt

Ecomat is warm mix asphalt that is produced and placed at temperatures up to 40° C cooler than traditional hot mixes. This cooler process saves energy, has fewer emissions and performs just as well as hot mix. In addition to these benefits, Ecomat may also help contribute to LEED credits.

### Roller Compacted Concrete

Standard General manufactures and places roller compacted concrete (RCC), which is used for specialized industrial and heavy duty paving. RCC has the same characteristics of traditional concrete but is compacted by traditional paving rollers. This makes RCC very strong and durable, has no joints and does not require hand finishing or steel reinforcing. The high strength of roller compacted concrete reduces rutting, does not deform under heavy loads, is resistant to spills and temperature changes. RCC is the efficient and economical choice for heavy duty surface construction.

### Cement Stabilized Subgrade

Where existing soil conditions are not favourable, we also can use various stabilization and strengthening processes by adding soil cement to enhance the soil to provide a stable and secure base for construction. Soil Cement Stabilization mixes Portland cement into the existing soil increasing the soil's strength and reducing the base water holding capacity. Soil Stabilization has many advantages eliminating the expense of excavating unsuitable soils, importing replacement materials, reducing the overall construction duration and strengthening the soil.

### Cold In Place Recycling

Cold in Place Recycling (CIPR) is a pavement rehabilitation and resurfacing process that reuses the existing paving materials and combines the material with new asphalt binder. This process is an eco friendly choice that eliminates the need to transport new aggregates and haul existing materials to landfills and minimizes traffic disturbance. CIPR is an effective, environmentally friendly solution to reverse the effects of potholes, rutting and reflective cracking and can be done on any existing roadway in need of repair. In conjunction with our sister companies, Standard General can provide CIPR as an alternative to your areas rehabilitation needs.

### LEED® credit contribution

Standard General can contribute to LEED credits through many of our products and services. Some of the credits we can assist you achieve include: Heat Island Effect, Construction Waste Management, Resources Reuse, Recycled content, Regional Materials, Innovation and Design and Regional Priorities.
